## Your Tours or Events, Bookable on Your Website!

RSVP.NET is a web based reservation system that connects directly to the RSVP Reservations database. RSVP.NET supports real time availability and allows your personnel and the general public alike to book tours directly from your website.

RSVP.NET fits inside your existing website and can be completely customized to match your existing color scheme and use your existing graphics.

## Date and Time Selection

The calendar displays the dates that are available and the dates that are not available are grayed out.

The selected date on the calendar is shown in red and the available tours for the selected date are displayed in the list to the right of the calendar. When a tour time is selected the maximum visitors that can be book for that tour is displayed below.

## Visitor Information

The RSVP.NET reservation page can be customized to capture the specific information you need for each type of tour or event for your business or organization.

All information entered is validated and the user is informed of missing data or if improper data is supplied.

A comments field is provided. This feature will help you tailor your tours and events to meet the specific needs of your visitors.

# RSVP.NET - RESERVATION WEB INTERFACE

## Confirmation Page

After the user makes a reservation, the confirmation page is displayed. This page is customized to include any guidelines, restrictions and travel directions to your facility. All of the information entered on the reservation page is presented and the page may be printed by the user.

In addition to the confirmation page, the system can be configured to send an e-mail confirmation.

## Real Time Database Updates

The RSVP database is updated immediately after a visitor makes a reservation. The web reservations are easily tracked, located and modified from the RSVP Reservation System.

## System Architecture

RSVP.NET was engineered utilizing Microsoft®.NET development tools which is infused into the products that make up the Microsoft platform, providing the ability to quickly and reliably host and deploy RSVP .NET all with the protection of industry-standard security technologies.

The system is developed to be deployed on the Microsoft Windows 2000 Server family. With it's built-in security technologies, support for web hosting, and the ability to quickly scale-out to meet increased demands, it provides one of the best solutions for hosting and deploying web based solutions.

The screenshot shows a web browser window titled "Tour Reservation Confirmation - Microsoft Internet Explorer". The page features the ACME ENGINEERING logo at the top. Below the logo, the heading "Tour Reservation Confirmation" is displayed. The main content area contains a thank-you message, a list of guidelines, a map, and reservation details. The map shows the location of ACME Engineering relative to Interstate 70 and Exit 101. The reservation details include the scheduled date and time, number of visitors, group name, and contact information. At the bottom of the page, there are buttons for "Home Page" and "Make Another Reservation", and a footer with copyright information and links to "Browser Version" and "Privacy Policy".

### Tour Reservation Confirmation

Thank you for making a sample reservation. ACME Engineering looks forward to your visit. For more information about the RSVP Tour Reservation System, please call (636)458-5740.

ACME Engineering maintains a safe and secure environment so please be aware of the following guidelines:

- No carry-on is permitted in the Visitor Center, including purses, backpacks, briefcases, or bags of any kind.
- A valid photo ID will be required for each adult scheduled for the tour.
- Cameras are allowed in the Visitor Center, but must be checked at the registration desk before the plant tour.
- Children with individual families must be in 1st grade or above to take the tour. School groups must be 4th grade or above.
